

# VALUE OF BOOKS

---

Good books enhance our knowledge. They are life of our mind. Reading is to mind what exercise is to body. The habit of reading shows a sign of culture, they are our guide in youth, they are a source of entertainment and may even calm our mind in many difficult situations. But one must select books carefully. All types of books do not bring pleasure. There are certain books which may misguide us. We should avoid such books.

Good books teach us wisdom and put a number of ideals before us. So, we should respect books and develop a habit of reading.
